

How to Add the Quote Tool to Your iPhone

This is our custom vinyl quoting app. It works completely offline once it's on your phone - no internet needed. Follow these steps to install it as a home-screen app.

1 Open the file I sent you

Open the email or text message and tap the file named JZac-Quote-Tool.html.

2 Open it in Safari

If you see a code preview or it won't open normally, tap the Share icon (the box with an up-arrow) and choose 'Open in Safari'. If you don't see that, tap 'More' then Safari. (It MUST be open in Safari for the next step to work.)

3 Tap the Share icon

Once the app is showing in Safari, tap the Share icon at the bottom of the screen (the square with the up-arrow).

4 Add to Home Screen

Scroll down the menu and tap 'Add to Home Screen', then tap 'Add' in the top corner.

5 You're done

A 'JZac Quotes' icon is now on your home screen. Tap it anytime - it opens full-screen and works with no internet connection.

Good to know

- Once installed, it saves your quotes right on the phone and works fully offline.
- To send a finished quote to a customer, open it and tap 'Export PDF' to save or share it.
